Unique wooden modules and assemblies

ModuleWorks

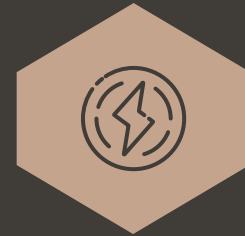

Our modules represent a revolutionary solution for **all groups of interested parties**. We are the first daredevil in Europe. The first to bring a unique product that sidelines metal containers and offers a modular solution made of wood.

Low price

Saving time in the design and construction process

Energy-efficient

Fast construction time

Why choose our wooden module or assembly?

The main idea behind **ModuleWorks** is its simplicity. Each project is made up of one or more so-called modules, which are created using precise manufacturing procedures. These fully assembled modules are then transported to the construction site, where they are assembled into the customer's chosen version within a short time.

What kind of constructions can we realize?

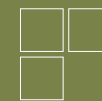

Business

- Restaurants/Food Facilities
- Residential complexes
- Office buildings
- Office and logistics buildings

Institutions

- School and medical facilities
- Homes for the elderly
- Buildings for catering
- Nurseries

People

- Modular or holiday home
- Extension to the house
- Cottage
- Garden house
